ELECTRONIC LOGBOOK

Transferring data from the iPhone HanDBase logbook

The PC/Mac RCA logbook can import and report data collected on the iPhone or iPod touch running the HanDBase RCA logbook. This helpsheet describes how to do this:

1. Establish a private network or connect both devices through an existing wireless network
2. Set up a browser connection in the HanDBase application on the iPhone
3. Open the browser connection on your computer between the iPhone and your PC/Mac
4. Find the HanDBase data file
5. Export the file in 'csv' format to your PC/Mac
6. Import it to the PC/Mac programme as a text file

Setting up the wireless network connection

1. First of all turn off your 3G telephone connection. The easiest way to do this is go to 'Settings' and turn ON 'Airplane Mode'.

2. Then go into 'Wi-Fi' and turn it ON.

3. If you have access to a wireless network, join it. Both the iPhone and your PC / Mac need to be connected to the same network.

4. If there isn't a wireless network already available, you can usually use your computer's wi-fi card to create one for the iPhone to join.

Connecting through HanDase on the iPhone

1. Once you have successfully joined the same wireless network with both your iPhone and your PC,
2. Open the iPhone HanDBase utility.
3. Click on the 'Connect' icon in the bottom right-hand corner of the HanDBase home screen.

ON YOUR PC / MAC:

1. Open your favourite browser (Firefox / Internet Explorer / Safari etc.)

2. Type the IP address that has appeared on the iPhone HanDBase screen into the PC/Mac browser address box.

3. The 'HanDBase Database List' will appear on the PC/Mac browser.

4. There are two 'Download' options available for each HanDBase data file.

5. The one on the left is a backup in HanDBase format but this is unreadable on a PC/Mac without the HanDBase desktop utility. DON'T use this option unless you already have the PC/Mac HanDBase desktop programme.

6. The one on the right is labelled 'C,S,V' and creates a comma-sepatated text file which can easily be imported into the PC/Mac version of the programme. Click the C,S,V icon to download a csv file to your PC/Mac.

7. You can choose where to save the file, but it will probably default to the PC/Mac desktop or your user/downloads folder.
